

Description

CASA 3500 PT is a thin spread tile adhesive designed for the installation of vinyl composition tile or PVC tile with calcium carbonate backing and may be used on suspended wood floors.

Advantages

- Cuts installation time by more than 70%
- C.R.I green label approved—no solvents
- Zero VOC
- Dyed blue for enhanced visibility
- Canister yields 3500 sq. ft. w/8002 tip
- Canister yields 2330 sq. ft. w/8003 tip

Application

When installing VCT or PVC tile, it is extremely important that the substrate be smooth and clean of all debris. Time spent preparing and cleaning the substrate prior to installation will save costly tile replacements later. Spray a thin coating of CASA 3500 PT (approximately 4 grams per sq. ft. w/8002 tip for VCT— 6 grams per sq. ft. w/8003 tip PVC) onto the substrate. Under normal ambient conditions, tile may be installed within 10 minutes after spray application. Open times of up to several hours are also possible if adhesive surface is kept clean. See CASA PT instruction manual for procedures to use CASA PT equipment and adhesives. This manual may be obtained from your local distributor, by calling direct at (888) 685-0025 or at our website www.casaadhesive.com.

Packaging

- No. 38 pressurized canister

Shelf Life

Six months from the date of manufacture in unopened container.
